Summary

I am a full stack web developer and a student furthering my studies in Computer Sciences. I have gained necessary skills and experiences over the years while building amazing software projects. I love building software that can serve individual needs and assist enterprises scale high in order to reach their full potential.

I currently have four (4) years of experience as a software developer.

I have gained experience by working on a wide range of software categories which includes:

- E-commerce (B2B, B2C, C2C, C2B)
- Real-estate and property
- NGO's
- Finance
- Portfolios

In short, I am very open to new opportunities to try new things and grow.

Over the years as a software developers, I have acquired skills in different technologies such as:

- NodeJS (Javascript)
- Python (Django)
- PHP (Laravel)
- HTML
- CSS
- React
- Typescript
- Tailwind CSS

Education

Federal University of Technology, Akure

Computer science • Akure, Ondo

05/2027

I am currently enrolled in the Federal University of Technology, Akure for a B.Tech (Bachelor of Technology) in Computer Science.

Skills

Communication skills, Time management, Computer literacy, Web architecture design, Backend development, Fullstack web development, Database Management

Experience

Maaxdo Technologies

Backend developer • Akure, Ondo

05/2023 - Present

I've built and designed backend infrastructures for various applications and gained experience in clean software architecture and design. Some projects include:

<https://thetbmevents.com>

<https://regainpharmacy.com>

<https://defutureelite.com>

<https://booklovo.com>

Among others

Ployco Universal

Part-time Fullstack developer • Akure, Ondo

08/2022 - 05/2023

I worked as a part-time fullstack developer building a fully functional web application and designing web architecture for scalable systems.

DWS (Domains and Web Services)

Software developer (Intern) • Osogbo, Osun

11/2021 - 08/2022

I learned how to use web technologies like HTML, CSS, PHP, NodeJs, React, Typescript and JavaScript to build real-life projects.

I also built side-projects with these technologies.

I also learnt the concept of team coherence and human-relations.

I assisted in building websites for clients by writing and refactoring code from existing codebases.
